4. Summary of significant accounting policies**4.1 Principles and methods for preparing consolidated financial statements**

NOTES TO THE MID-YEAR CONSOLIDATED FINANCIAL STATEMENTS (cont'd)

For the first quarter of 2025

(These notes form part of and should be read in conjunction with the accompanying consolidated financial statements)

4.1.1 Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries.

Subsidiaries are entities controlled by the Company. Control is achieved where the Company has the power to govern the financial and operating policies of an investee entity so as to obtain benefits from its activities. The financial statements of subsidiaries are consolidated from the effective date of control up to the date of cease to control.

The financial statements of the subsidiaries are prepared for the same year as the parent company, using consistent accounting policies. Adjustments are made for any differences in accounting policies that may exist to ensure consistency between the subsidiaries and the Company.

All intra-company balances and transactions, unrealized profits or losses arising from intra-company transactions, have been eliminated in full when preparing the consolidated financial statements.

4.1.2 Business combination

The assets, liabilities, and contingent liabilities of a subsidiary are recognized at their fair value on the acquisition date. Any excess of the purchase price over the total fair value of the acquired assets is recognized as goodwill. Any deficiency between the purchase price and the total fair value of the acquired assets is recognized in the income statement for the accounting period in which the subsidiary acquisition occurs.

4.1.3 Method of recognizing non-controlling interests

Non-controlling interests represent the portion of net assets in a subsidiary not held by the Company and are presented within equity in the consolidated balance sheet, separately from parent shareholders' equity. The value of non-controlling interests in the net assets of consolidated subsidiaries includes: Non-controlling interests at the acquisition date, measured at the fair value of the subsidiary's net assets at the acquisition date; non-controlling interests in changes in total equity from the acquisition date to the beginning of the reporting period; and non-controlling interests in changes in total equity occurring during the reporting period. Losses in subsidiary are respectively attributed to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Non-controlling interests represent the portion of profit or loss in a subsidiary not held by the Company. They are determined based on the non-controlling interest percentage and the subsidiary's profit after corporate income tax and are presented as a separate line item in the consolidated income statement.

4.2 Exchange rate differences applied in accounting

Transactions denominated in foreign currency are translated into VND using the actual exchange rate announced by the commercial bank where the Company trades on the date of the transactions.

At the balance sheet date, monetary items denominated in foreign currency that are classified as assets are revaluated using the buying exchange rate and monetary items denominated in foreign currency that are classified as liabilities are revaluated using the selling exchange rate of the commercial bank where the Company regularly trades. Foreign currency deposits in banks are revaluated using the buying exchange rate of the bank where the Company opens foreign currency accounts.

Exchange rate differences are realized in accordance with Vietnamese Accounting Standard No. 10 "The Effects of Changes in Foreign Exchange Rates". Accordingly, foreign exchange differences arising during the year and those resulting from the revaluation of the closing balances of monetary items denominated in foreign currencies are recorded in the financial results for the year.
